

Kennametal purchases the 1000th SmartScope® Flash 200 System - 12/04

OGP delivers the 1000th Smartscope Flash 200 to Kennametal

Earlier this year, Optical Gaging Products shipped its 1000th SmartScope® Flash 200 personal metrology system to the Kennametal, Inc. facility in Orwell, Ohio. Kennametal selected the OGP system to provide accuracy and repeatability for their precision products. The SmartScope Flash 200 metrology system helps Kennametal maintain its measurement efficiency.

According to their website, Kennametal is the market leader in North America in metalcutting tools and is second in Europe and worldwide. It is the undisputed global market leader in tools for the mining and highway construction industries. With a vast array of end markets, including industries such as aerospace, automotive, construction and farm machinery, power generation and transmission equipment, home appliances and oil and gas exploration. Developed for a wide variety of applications, the SmartScope Flash 200 is flexible and exact.

The innovative, automatic SmartScope Flash 200 incorporates numerous innovative and patented technologies for accurate dimensional measurement. Powerful enough for rapid measurement of complex parts, compact enough to fit on a workbench, and easy to operate by users of all skill levels, SmartScope Flash 200 is the popular choice in video measurement systems.

The OGP SmartScope Flash 200 personal metrology system was selected by Kennametal to provide accuracy and repeatability required for their precision products.
